MY16 SUSPENSION LYRIK

LYRIK

INTRODUCING THE NEW LYRIK – FOR THOSE WANTING MORE.

Everything you love in Pike in a stiffer, more capable, longer travel option. We built the new Lyrik for the riders who know there will always be more to explore, more to challenge and more to conquer. If it's out there, they're going to ride it, and the new Lyrik will always be up to the task. It's built on a stiffer yet lightweight 35mm chassis, equipped with the world-acclaimed Charger Damper featuring new Torque Cap and Boost compatibility, and is available in 160mm-180mm travel options for 27.5" and 150mm-160mm for 29". Lyrik combines single crown weight and agility with dual crown strength and aggression, blurring the lines of capability that limit all other forks in its class. The new Lyrik is built to inspire confidence and give you that much more. So keep going – Lyrik is ready.

EMBARGO: July 7th, 2015, 9:00am Chicago time/4:00pm Central European Time

AVAILABLE: October 2015

PRICING

- Lyrik RCT3 Solo Air, all, travels and configurations: 1,030.00 US\$, 1075 €, 824 £
- Lyrik RCT3 Dual Position Air, all AM wheel sizes, travels and configurations: 1,110 US \$, 1158 €, 888 £
- Lyrik RC: OEM only

NEW TECHNOLOGIES:

- 15x100 and Boost 110 (15x110) versions
- Torque Caps compatible (15x100 and Boost 110 versions)
- Tapered legs, taller stiffer brace – chassis optimized for stiffness and light weight
- New retuned Solo Air spring with additional negative volume for a plusher initial stroke
- Bottomless Token tunable in both Solo Air **AND** Dual Position Air configurations
- **SKF wiper seals** – lower friction better sealing
- User tunable rebound damping via internal shims (same as BoXXer)

PROVEN FEATURES:

- 35mm chassis
- Charger Damper with new **SKF cartridge seal** – reduced friction and extended service intervals
- Solo Air and Dual Position Air
- Fast Black upper tubes

MY16 SUSPENSION YARI

AGILITY AND STRENGTH IN A RELIABLE BOMBPROOF PACKAGE WITH MORE TRAVEL CONFIGURATIONS

Yari is for riders who aren't afraid to go for it. For the ones who don't know where the limit is, but are prepared to find out. The climbs, jumps, views, and natural terrain these riders encounter might be new to them, but they want to experience it all. Built with the same confidence-inspiring strength and stiffness as Lyrik and featuring the new, refined Motion Control damper, Yari is available in shorter travel configurations (starting at 120mm), making it a perfect complement to any ride. Riders who are constantly testing their own limits can be confident they're well within Yari's. Introducing the new 2016 RockShox Yari – Go for more.

ROCKSHOX OFFERS BOOST 110 COMPATIBLE OPTIONS OF ITS MOST POPULAR FORKS.

With revolutionary advancements in bicycle componentry, like SRAM's XX1, X01 and X1 drivetrains, mountain bike designers have been given almost limitless freedom to focus solely on the performance of the bike. Each advancement demands that the entire package works flawlessly. Aggressive trail and enduro riders have been increasingly enjoying the benefits of larger wheels, but many still view 27.5" and 29" wheels as a possible weak link. Which is why SRAM has developed an open standard with Boost compatible components for SRAM drivetrain, hubs and RockShox forks.

- **27.5" Boost 110 option** is available on Pike, Lyrik and Yari
- **29" Boost 110/27.5+ option** is available on SID, Reba, Pike, Lyrik and Yari.
- All 29" forks with Boost 110 compatibility also fit 27.5" Plus (27.5" x 3.0 tires)

MY16 SUSPENSION

TECHNOLOGY: TORQUE CAP COMPATIBILITY

UNIQUE TO ROCKSHOX: TORQUE CAPS

- Larger interface between dropout and hub end cap results in stiffer front end - increased steering precision, better bike handling, more confidence.
- Lyrik and Yari are Torque Cap compatible in **both 15x100 and Boost 110 (15x110) models**
- All RockShox 15x110mm forks are Torque Cap compatible (SID, Reba, Pike, Lyrik, Yari)
- Torque Caps are compatible with the following SRAM wheels and hubs: Rise XX, Rise 60, Roam 30, Roam 40, Rail 40 and X0 hubs.
